CELL SYSTEMS & ANATOMY

MASTER OF SCIENCE PROGRAM
ANATOMICAL SCIENCES TRACK

UT Health
San Antonio
Graduate School of
Biomedical Sciences

OVERVIEW OF PROGRAM

The Graduate Program in Cell Systems & Anatomy provides a rewarding opportunity for students wishing to pursue a Master's Degree in preparation for a fulfilling career in biomedicine. Our program has two tracks: an Anatomical Sciences Track and a Mechanisms of Health and Disease Track. Students may select either track to obtain their Master's degree. A minimum of 30 semester hours of graduate credit is required for the Master's degree.

The Anatomical Sciences track offers in-depth coursework in micro- and macro-anatomy including Inter-Professional Human Gross Anatomy, Anatomy Practicum, Neuroanatomy, Histology, Presentation Skills and Supervised Teaching in Medical or Dental Gross Anatomy classes.

Students participate in Anatomy Grand Rounds and complete a thesis project under the supervision of a mentor. These projects may include the design, development and evaluation of a 3D anatomical model, identification and analysis of anatomical variations or bench research projects pertinent to anatomy.

ADMISSION REQUIREMENTS

- A baccalaureate degree in a natural science, biomedical engineering, and/or any other relevant discipline from an accredited institution in the United States or proof of an equivalent degree from a foreign institution is required.
- A cumulative grade point average (GPA) no lower than "B" (3.0 on a scale of 4.0) on undergraduate-level studies undertaken previously is required.

ANATOMICAL SCIENCES TRACK

- Interdisciplinary human gross anatomy course with full cadaveric dissection
- Unique opportunities for teaching and tutoring medical, dental and other health professional students
- Highly acclaimed teaching faculty with many awards including the prestigious Piper Professorships, UT System Regents Outstanding Teaching Awards, and UT Health San Antonio Presidential Teaching Excellence Awards
- Graduates of the program enrolled in medical or dental schools

Learning anatomy is really important because you are able to understand any deviation from the norm. I think Anatomy is the foundation for learning medicine; without a solid base in anatomy as a physician or clinician, you would be lost.
