

## UROLOGY GOALS AND OBJECTIVES

### General Inpatient Hospital Urology PGY-1 (Urol-1)

#### Specific Goals:

- Develop a basic understanding of the pathophysiology of common genitourinary conditions
- Develop a general understanding of interventions both medical and surgical that are necessary to treat common genitourinary conditions.
- Begin to develop a clinical or basic science research project.

#### General Objectives:

- Read the entirety of the Wieder's Urology Handbook text during the course of internship (PGY-1).
  - Participate in the monthly urology discussion group sessions dedicated to this review.
  - Participate in Urology conferences while rotating on service.
  - Work with the faculty mentor to develop the basics of the research project (concept, initial application for funding, IRB approval, etc.).
  - Begin to develop unique QI project ideas with your faculty advisor.
  - Participate in Urology Orientation Lab at the end of June after the PGY-1 year.
  - **Mechanism of learning:** Reading, mentoring by upper level residents/faculty, conferences, on rotation experience.
  - **Competency:** Patient Care, Medical Knowledge, Interpersonal & Communication Skills.
  - **Documentation:** Faculty evaluation.
-
