

## **PEC DUTIES AND RESPONSIBILITIES**

Approve by GMEC: November 8, 2016

The Program Evaluation Committee (PEC) meets at least on an annual basis to assess the overall educational program. Input from the Clinical Competency Committee (CCC) is also taken into account when addressing developmental issues for the program. All aspects of the program are reviewed including the curriculum, rotation schedules, goals and objectives for each rotation, performance of the graduates, research opportunities, responses to ACGME recommendations, internal review recommendations, faculty assignments, faculty and resident rotation and program evaluations, resident and faculty survey results, etc. The goal of this committee is to continually improve the character and efficiency of the educational effort. We hope to turn out the best-educated, clinically competent and surgically talented group of new urologists each year.
